

**Statement of Work:
7th Floor South Monitoring System
552-12-3-325-0116**

Background

- This project is for delivery and installation of a camera monitoring unit for the 7th Floor South (Mental Health/Psych Unit) at the Dayton VAMC.
- The project exists due to the need for new cameras, due to the age of the older ones. The cameras are necessary for employee and Veteran safety.
- There is a mandatory requirement to have a monitoring system on Mental Health/Psych Units.

Objectives

- A monitoring system shall be installed for the use of ensuring patient and employee safety on the 7th floor south of the Dayton VAMC.
- The goals and objectives are to have a working camera/monitoring system by 30 calendar days after contract award.

Scope

- Contractor will provide all cameras, TV monitor, equipment, labor to install a monitoring system on the 7th floor south of the Dayton VAMC located at 4100 West Third Street, Dayton, OH 45428-9000.

Tasks or Requirements

- The contractor shall provide all labor, material, and equipment to install sixteen (16) cameras, one (1) mount monitor, and provide training to the Nurse Manager & Staff on the proper use of the system.

Selection Criteria

- Dayton VAMC Camera System requirements:
 - A. Minimum of 72 hours of recording available per camera
 - B. 8 TB of internal storage
 - C. Real-time SD and HD Camera recording
 - D. 42 inch HD Color Monitor
 - E. Lens capability of spanning 105-110 degrees on each camera
 - F. Camera must be programmable
 - G. Cameras must mount in the ceiling
 - H. A quantity of 21 cameras is being requested.
 - I. Cameras are to be installed in a locked psychiatric unit and shall be mounted as to not create a hanging hazard.
 - J. Contractor is required to be briefed by Psychiatric Staff prior to the commencement of work to understand special requirements and procedures while in a locked psychiatric unit.

K. Additional electrical outlets will not be provided by the Dayton VAMC.

Deliverables or Deliver Schedule

- Contractor shall provide all materials, labor, and parts to install the system effectively and in working condition.
- The schedule for deliverables: After project award, deliverables of installation of camera system shall be within 30 calendar days of award.
- Contractor shall provide wire and labor to install camera in location where wiring does not currently exist.
- Contractor shall provide “as built” drawing and technical documentation for system components and set-up configuration.

Government-Furnished Equipment and Government-Furnished Information

- The Contractor shall use the current wiring system to install the new camera system. One location will require the installation of a new camera which will require the contractor to run additional wire. The location, type, and amount of wire required for the installation will be provided in the solicitation documents. Contractor can refer to the drawing provided-- the area being referred to is labeled Nurses Station C-21 and C-25.
- The Government will not furnish any equipment to the contractor to install the camera or monitor.

Performance Measure

- Provide a camera monitoring system;
- Properly install the system;
- Provide evidence of acceptable operation of the installed equipment;
- Provide training on the operation and use of the system to selected VA personnel.

Place of Performance

- Work to be performed on the 7th floor South unit at the Dayton VA Medical Center, in Dayton, Ohio. The Nurse Manager and the Chief, Biomed will be the Points of Contact and reference at the Medical Center. Names will be provided upon contract award.

Period of Performance

- Work shall be performed between the hours of 8am and 5pm during all week days, not on Saturdays, Sundays, or Federal Holidays.

BOSCH
Invented for life

Bosch Professional Large Full HD LCD Monitors

- ▶ Support up to 1920 x 1080 Full HD resolution
- ▶ Picture-in-picture (PIP) or split screen function
- ▶ HDMI, DVI, VGA, S-Video inputs
- ▶ Two composite BNC inputs and loop-through output
- ▶ Trigger and Auto Switching features
- ▶ High contrast ratio 4,000:1 (UML-262-90) and 3,500:1 (UML-422-90)
- ▶ 178 degree horizontal and vertical viewing angles
- ▶ Color enhancement engine and built-in speaker
- ▶ Anti-image retention mode and Super High Resolution of 600 TV Lines

The Bosch Professional Large Full HD LCD monitors are 1080p Full HD resolution, color monitors ideal for use with analog video, digital video recorders (DVRs), and with PC applications. The monitors feature a color LCD flat-screen panel and are available with 26-inch or 42-inch viewable picture areas. Each monitor features a wide range of horizontal and vertical viewing angles that provide comfortable, clear viewing – whether you place it on a desktop or mount it to a wall or a ceiling.

Functions

Excellent image quality

The Bosch Professional Large Full HD LCD monitors automatically adapt to the input resolution of the incoming video signal, and support up to 1920 x 1080 resolution (Full HD). The monitors' analog VGA input easily accommodates the widespread use of PCs in today's security surveillance systems. Their high contrast ratio (4000:1 or 3500:1) and high brightness rating (450 or 700 cd/m²) offer excellent color accuracy and imaging for easier viewing and interpretation of images. The panel refreshes every eight milliseconds, so you get crisp, clear images with less smearing - and less image "ghosting" in fast-motion video.

True color enhancement

The monitors provide true color performance. The monitors automatically focus on setting the correct color temperature, and gamma curve settings to deliver the highest possible picture quality.

Super high resolution

The Bosch Professional Large Full HD LCD monitors offer 600 TV Lines of resolution to offer a sharp, clear picture.

700 Series Hybrid/Network HD Recorder

www.boschsecurity.com

BOSCH
Invented for life

- ▶ Real-time HD and SD camera recording
- ▶ 32 channels for IP and analog cameras
- ▶ Automated IP assignment and management
- ▶ Up to 8 TB of internal storage
- ▶ Video synchronized to text sources

The Bosch 700 Series Hybrid and Network HD Recorders offer top-of-the-line performance and adaptability. Equipped with four front-replaceable hard drives and extensive integration features, the 700 Series is ideal for medium to large-scale systems. The 700 Series' superior image quality and compression gets the most out of CCTV images. Available in both IP-only and hybrid models, the 700 Series can handle even the most challenging CCTV applications without excessive demands on installers or operators.

Functions

High performance H.264

With recording of 1080p30 and 720p60 IP cameras, as well as SD and analog 4CIF cameras, 700 Series Recorders capture all the details. More detail typically means increased bandwidth, larger storage requirements, and increased costs – but not with the 700 Series. Bosch's advanced H.264 compression technology used in the 700 Series reduces bandwidth and storage needs by up to 30% or more compared to traditional MPEG-4 systems.

Viewing and playback

View live images of analog and IP SD cameras on the local monitor as full-screen or multi-screen displays. The extensive search options make it easy to find and playback the recorded images from these cameras locally.

The supplied Bosch Video Client software allows you to remotely display live and recorded video in 4CIF, SD and HD resolution.

Embedded design

The embedded design of the 700 Series Recorder offers a higher level of security against network attacks than traditional systems and has lower maintenance requirements. The security of recordings remains high while eliminating the need to install software patches and anti-virus updates. The integrated architecture, built-in installation wizards, and low-maintenance design make the 700 Series easy to set up and operate while delivering a lower total cost of ownership.

Hybrid Models

The world of CCTV is changing – IP is replacing the analog standard in many areas. Bosch's 700 Series Recorders have the flexibility to adapt to this changing environment.

The 700 Series Hybrid Recorder is the ideal choice for growing applications which use a mix of analog and IP cameras. It can record 8 or 16 analog cameras and an additional 8 or 16 IP channels.

Hybrid models with 8 or 16 IP channels have 36 Mbit/s of bandwidth available in total for video streams from IP cameras.

Network Models

The 700 Series Network Recorder is the perfect match for pure IP environments. Network recorder models have 72 Mbit/s of bandwidth available in total.

While typical IP solutions consist of many separate components – NVR Server, PC Client, external RAID storage array and software – the 700 Series Network Recorder is an all-in-one IP video management solution.

With support for a total of 32 H.264 cameras and a fully automated, onboard IP camera management system, 700 Series is easy to set up and maintain right out-of-the-box.

Power to integrate

Bosch's VideoSDK provides a complete toolbox of modules for playback, searching, viewing live images and more – simplifying integration with other surveillance systems. The VideoSDK even allows integration with specialized software tools such as fraud detection programs for retail applications. Control of 700 Series Recorders can be automated using CLI (Command Language Interface) commands. This allows the 700 Series to be interfaced with external software (over RS232 or IP), which is typically used to sense alarms or handle access control on an existing (embedded) computer system. Functions include front panel emulation, configuration, and viewing status information.

Text data

There is extensive support for recording text data from external sources (such as ATM machines, license plate readers, positioning systems or cash registers) together with the associated video.

Live text data can be viewed locally and remotely together with the video synchronized to it. Searching text data allows fast retrieval of the relevant video and provides legal evidence in the event of fraud.

Flexible and reliable storage

Access the four internal hard drives via the front without opening the unit, thus simplifying service and making it easy to add additional storage on-site when needed. Configure the disks as a RAID 4 array for extra reliability.

Expand storage further with an external Bosch iSCSI video storage array. This makes the 700 Series ideal for applications requiring continuous recording at the highest resolution, frame rate, and retention time.

Ease of use

Find key events in recorded video quickly by utilizing the unit's smart search to find changes only in selected areas. Compare past and present events by simultaneously viewing live images with playback scenes.

Export recordings by simply downloading them to a USB memory device, burning them to the optional built-in DVD recorder, or exporting them remotely via the Bosch Video Client or Control Center software. The 700 Series makes it easy to manage and transport images. Exports in Bosch format are watermarked to ensure the authenticity of the recordings. These can be played back on the recorder unit itself. ASF exports can be played on any PC with a suitable media player.

Intuitive user interface

The unit's intuitive interface with clear, menu-driven options is quick to learn and easy to use. Choose from a selection of control devices, including a mouse or CCTV keyboard. With the keyboard loop-through feature, up to sixteen 700 Series Recorders can be controlled from a single IntuiKey keyboard. Flexibility is also abundant with its extensive range of advanced functionality. Other convenient features include remote playback capability and dual VGA monitor support. Live viewing, playback, configuration, remote management – it is all simple and straightforward with the 700 Series.

Comprehensive interfaces

Flexible interface options make it easy to connect to a variety of external devices.

- Up to 16 analog video inputs and 16 IP camera inputs on hybrid models, or up to 32 IP camera inputs on IP-only models. Both SD and HD cameras are supported.
- Up to 16 audio inputs (DHR Models only) and two dual-mono audio outputs
- One or two monitor (DHR models only) outputs on VGA, CVBS, and Y/C outputs
- Up to 4 front-replaceable hard disks with optional RAID-4 support
- One or two Ethernet 10/100/1000 BaseT network connections
- Up to 16 alarm inputs and 5 relay outputs
- Biphase connection allows one cable to control Bosch PTZ cameras at a range of up to 1.5 km / 0.9 miles
- Bosch (OSRD protocol) and third-party (Pelco D and P protocols) PTZ control via RS422/RS485 connection
- Bosch IntuiKey support with loop-through function
- Bosch Video Manager support (including Keyboard Expander LTC2604/x0)
- USB connectors front and back – connect a mouse to control the user interface or archive video to a USB memory stick
- Optional built-in DVD recorder
- Text data interface directly from IP source or from a bridge device

Applications

The 700 Series Recorder is ideal for:

- Shopping centers and retail applications
- Banks and financial institutions
- City centers and public monitoring applications
- Crowd surveillance
- Casinos and hotel complexes

Technical Specifications

Electrical

Rated Voltage and Power

Power input	100 to 240 VAC; 50/60 Hz
Power consumption	Max. 2.5 to 1.0 A (250 Watt) 835 BTU/h Able to withstand power dips up to 100 MS, assuring continuous operation

Video

Video standard	PAL or NTSC auto-detection
Resolution	704x576 PAL, 704x480 NTSC
Compression	H.264
Inputs	8 or 16 composite video 0.5 to 2 Vpp, 75 ohm automatic termination
Outputs	8 or 16 composite video 1 Vpp, 75 ohm, sync 0.3 V \pm 10%

Audio

Inputs	8 or 16 line in (DHR models only), mono RCA, 1 Vpp, 10 kohm
Output	2 line out, dual mono RCA, 1 Vpp, 10 kohm
Compression	MPEG-1 layer II
Sampling rate	24 kHz per channel

Monitors

MON-A	Live, playback, menus
	VGA: analog RGB 1280x1024, 60/75 Hz (NTSC/PAL)
	CVBS: 1 Vpp, 75 ohm, BNC
	Y/C
MON-B (Hybrid models only)	Live
	VGA: analog RGB 1024x768, 60/75 Hz (NTSC/PAL)
	CVBS: 1 Vpp, 75 ohm, BNC
	Y/C

Display Modes

Monitor A	Full, full sequence, quad, multi-screen (live and playback), event call-up (live)
Monitor B (Hybrid models only)	Full, full sequence, quad, multi-screen, event call-up (live)

Frame rate PAL/ NTSC	25/30 IPS per channel (real time)
Multi-screen mode 8 channels	1, 2x2, 3x3 (showing 8 channels)
Multi-screen mode 16 channels	1, 2x2, 3x3, 4x4
Zoom	1.5x, 2x, 3x, 5x
Display languages	Chinese (Simplified), Czech, Danish, Dutch, Finnish, French, German, Greek, Hungarian, Italian, Japanese, Norwegian, Polish, Portuguese, Russian, Spanish, Swedish, Turkish.

Alarm Handling

Inputs	Screw terminal, 8 or 16 inputs, configurable NO/NC, Max. input 40 VDC
Outputs	Screw terminal 4 relay outputs, configurable NO/NC, max. rated 30 VAC, 40 VDC, 0.5 A, continuous -10 VA
Remote notification	Via Control Center software
Malfunction relay	Temperature related failures, Voltage ratings, Disk failures

Connections

Ethernet	1 or 2 RJ45 modular jack, 8 pins shielded: 10/100/1000 Base-T
Biphase	Screw terminal connector (5 outputs) Maximum 5 controllable cameras per Biphase output Impedance 128 ohm, max. overvoltage protection \pm 40 V, max. cable length 1.5 km (0.9 miles)

Note: LTC 8785 translator needed for fixed-speed receivers/drivers

PTZ control interface	RS485
Serial interface	RS232 output signals according to EIA/ TIA-232 F, max. input voltage \pm 25 V 2xDB-9 male connector
Intuikey keyboard (KBD Digital or KBD Universal)	Conforms to RS485, max. signal voltage \pm 12 V, power supply to keyboard 11 to 12.6 VDC at max. 400 mA RJ11 modular jack 6 pins
USB	Five USB 2.0 ports
10/100/1000 Base- T network interfaces (max 2)	Connect with Bosch iSCSI Video Storage Arrays

Network

Bandwidth control	0.1-100 Mbps limiter
-------------------	----------------------

Remote users	Maximum 7 simultaneously connected Control Center users
Protocol support	TCP/IP, DHCP, DNS, and SNTP
IP cameras	Up to 16 IP H.264 for DHR models (optional) Up to 32 IP H.264 cameras for DNR models (optional)
Supported IP H.264 devices	Dinion, FlexiDome, AutoDome Modular, EX series IP cameras, VIP X series encoders (running firmware 3.7 or later, and AutoDome Easy IP

Storage

Internal HDD	500 GB, 1 or 2 TB per disk Up to 4 hard disks
Redundancy	RAID-4 (4 hard disks plus optional license required) Effective storage = Smallest disk x 3

Exporting

DVD	Built-in DVD+R/RW recorder (optional)
USB	Flash memory or external HDD (FAT32)
Network	Bosch Video Client or Control Center Software

Security

Password protection	Multi-level
Image authentication	All recordings and archives in native file format

Record Frame Rate

BOSCH

Invented for life

VDN-498 Series FlexiDome 2X Dome Camera

- ▶ 20-bit Image Processing Technology
- ▶ CCD sensor with Wide Dynamic Range
- ▶ Dynamic engine with Smart BLC
- ▶ Detail enhancement
- ▶ True Day/Night performance with switchable filter
- ▶ High impact, vandal-resistant, weatherproof housing
- ▶ Patented dome shape for 90° vertical view

The FlexiDome 2X Day/Night camera is the ultimate solution for virtually any indoor or outdoor surveillance application. This vandal-resistant dome camera uses a 1/3-inch, wide dynamic range CCD sensor and incorporates advanced (20-bit) digital signal processing for outstanding picture performance.

The 20-bit image processing enhances sensitivity; the 2X-Dynamic extends the dynamic range. This unique combination provides a sharper, more detailed image with outstanding accuracy in color reproduction even under harsh lighting conditions.

The cast-aluminum housing, polycarbonate dome, and hardened inner liner can withstand the equivalent of 55 kg (120 lbs) of force. The enclosure contains the full-featured camera and integral varifocal lens. Ideal for outdoor use, the cameras are protected against water and dust to IP 66 (NEMA-4X) standards. The camera enclosure provides the extra protection necessary for applications such as schools, banks, prisons, parking garages, retail and industrial buildings.

Installation is quick and easy, as the camera comes completely assembled and ready to use. Using the proprietary pan/tilt/rotation mechanism, installers can select the exact field of view. Mounting options are numerous, including surface, 4S (USA), wall, corner and suspended ceiling. The compact, sleek design and virtually flush-mount appearance complements any decor.

The FlexiDome 2X camera is an ideal solution for many surveillance applications, even under the most challenging lighting conditions. The day/night feature ensures the highest image quality possible at any time. Depending on the available light the camera will automatically switch from color to monochrome.

All FlexiDome cameras are supplied ready to operate. Six distinct pre-programmed operational modes are stored in the camera. Recall the mode that suits your application for optimized performance.

Functions

Detail in Extreme Lighting

In harsh lighting, the difference between the brightest and the darkest parts of a scene can be extreme. To produce a clear picture in these conditions, the CCD sensor in the FlexiDome 2X generates two images; one long exposure to resolve details in the scene's darkest areas, and one short exposure to resolve details in the scene's brightest areas. The Digital Signal Processor (DSP) of the FlexiDome 2X combines these dual shutter images, mixing pixels from each exposure to produce the most detailed image possible.

20-bit Image Processing

The highly accurate digital signal processing optimally captures the detail in both bright highlights and deep shadows simultaneously. By combining 20-bit image processing and wide dynamic range, the FlexiDome 2X maximizes the information visible in the picture even with strong backlighting.

Wide Dynamic Range

The superior wide dynamic range handling for all lighting conditions reveals details previously unseen.

2X-Dynamic and SmartBLC

Using 2X-Dynamic technology, pixel-by-pixel analysis provides the user with the most detailed information. Turn on SmartBLC to automatically compensate the image without the need for complicated set-up or without compromising dynamic range.

Detail Enhancement

Features such as Autoblack and Sharpness further improve the details in a scene, pixel by pixel.

Day/Night Mode

The day/night mode provides enhanced night viewing by increasing the IR sensitivity. The IR filter can switch from color to monochrome automatically by either sensing the illumination level or via the alarm input. The filter can be switched manually via the alarm input, through the camera menu or via the Bilinx coaxial control interface. An internal through-the-lens IR detector enhances the monochrome mode stability, as it prevents reverting to the color mode when IR illumination is dominant. IR contrast is also measured and used to handle reflected IR light in outdoor scenes.

Privacy masking

Four different privacy zones allow specific parts of a scene to be blocked. Pre-program any part of the scene to be masked.

Default Shutter

The default shutter speed captures fast moving objects when sufficient light is available. When light levels fall and other adjustments have been exhausted, the shutter speed reverts to a standard setting to maintain sensitivity.

Bilinx Technology

Bilinx is a bidirectional communication capability embedded in the video signal of all Bosch FlexiDome cameras. Technicians can check status, change camera settings and even update firmware from virtually anywhere along the video cable. Bilinx reduces service and installation time, provides for more accurate set-up and adjustment, and improves overall performance. In addition, Bilinx uses the standard video cable to transmit alarm and status messages, providing superior performance without additional installation steps.

Ease of installation

Several features are available that make installation easy:

- Video connection BNC on flying lead
- Power connection on flying leads
- A built-in test pattern generator produces signals to test and fault-find cables.
- A multi-language On-Screen Display (OSD) increases user compatibility.

Programmable Modes

Six independent, pre-programmed operating modes support typical applications, but are fully programmable for individual situations. Switching between modes is easy via Bilinx or the external alarm input.

High efficiency

A high efficiency power supply improves maximum operating temperature.

Video Motion Detection

The built-in video motion detector allows you to select a programmable area with individual thresholds. The global scene change detector minimizes false alarms caused by sudden lighting condition changes, such as switching on or off the indoor or security lighting. When motion is detected, alarms can be displayed in the video signal, the output relay can be closed or an alarm message can be transmitted via Bilinx.

SensUp Dynamic

By increasing the integration time up to 10 times on the CCD, the effective sensitivity is dramatically enhanced. This is especially useful when relying only on moonlight for illumination.

Lens Options

With the FlexiDome 2X dome camera, there is no compromise between scene coverage and aesthetics of the camera. The camera brings the widest choice of lens selection. Choose lenses between 2.8 to 10 mm for wide coverage, 9 to 22 mm VF lens for standard coverage, or 6 to 50 mm for long-range coverage.

Typical applications

- Entrance foyer/lobby with glass
- Warehouses and loading bays
- Prisons and correctional facilities
- Airport locations including:
 - baggage handling
 - fuel and equipment storage
- Stadium
